

EMERGENCY DEVELOPMENT PROGRAMME (PDU)

Project " ABS II : Sector Budget Support for Water and Sanitation "

        	Donor(s) The Federal Ministry for Economic Cooperation and Development (BMZ)
	PAYS PARTENAIRE(S) Burkina Faso
	CODE 201868785
	BUDGET 18.000.000 Euro
	DURATION 2018 – 2020
	PHASES Execution/implementation
	EXECUTING AGENCY Coopération Financière Allemande (KfW)
PARTENERS Ministère de l'eau et de l'Assainissement	
PDU PILLAR(S) I : access to water and sanitation	

DESCRIPTION

The Sector Budget Support for Water and Sanitation (ABS II) is a project of the German Financial Cooperation (KfW) whose objective is to support Burkina Faso in the implementation of its National Strategy for Water and Sanitation. The KfW's grant of EUR 18 million will support the Burkina Faso Ministry of Water and Sanitation (MEA) to provide drinking water supply and sanitation infrastructure to the population over the course of three years (2018-2020).

This project is a part of the Emergency Development Programme (PDU) of the G5 Sahel. In the margins of this programme, the project will contribute to the achievement the Pillar I of the PDU:

Pillar I: Help to improve the populations living conditions with greater access to basic services through better access to water and sanitation.

OBJECTIVE

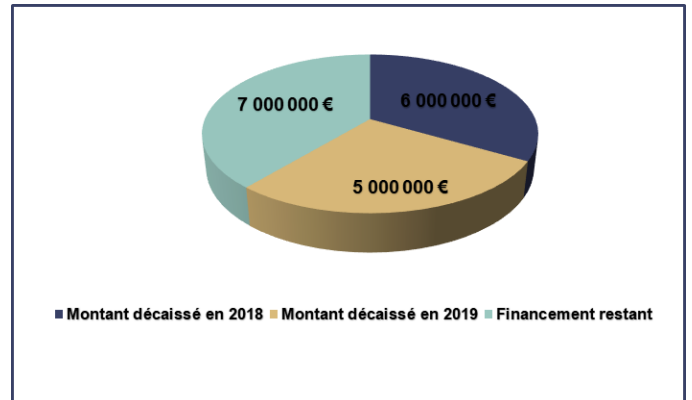

The objective is to contribute to the equitable and sustainable improvement of access to water, sanitation and hygiene for the population, particularly in rural and peri-urban areas.

CURRENT PROJECT STATUS

After two years of implementation, EUR 11 million was transferred to the Burkina Faso state budget, corresponding to the 61% of the overall project amount.

Complementing other donors' budget support efforts, especially those of the EU and Burkinabé state, the project contributed to the construction of water and sanitation infrastructures in the 13 regions of Burkina Faso, with a stronger focus on fragile areas.

QUELQUES REALISATIONS

As an example, the project contributed in 2019 to the construction and rehabilitation of several water and sanitation infrastructures in the fragile areas of Burkina Faso (Sahel, North, north-central, East, East-central and Boucle Du Mouhoun). This involves the construction of 302 boreholes, 10 simplified drinking water supply systems, 6095 latrines and 2352 domestic cesspools. In addition, 172 boreholes and 10 simplified drinking water supply systems were rehabilitated.

What is the Emergency Development Programme (PDU)?

In 2018, the Heads of State of the G5 Sahel requested the Permanent Secretariat of the G5 Sahel (SPG5 Sahel) to launch, as a matter of urgency, quick-impact projects. Thus, they launched the Emergency Development Programme (EDP) in fragile border areas identified by the G5.

In response to the G5 Sahel States' request for UDP funding, the members of the Sahel Alliance have mobilised a response of approximately 226 million euros for a total of 21 projects and programmes.

These actions meet the following 3 criteria: (i) Location in fragile cross-border areas identified by the G5, (ii) responding to specific sector-based themes (iii) Visible achievements as of the end of 2018/beginning of 2019.
